

## GOALS

SJRMP will continue its efforts to develop and prioritize a comprehensive list of management strategies to benefit the San Joaquin River system. In addition, SJRMP participants will continue their efforts to streamline the program itself by establishing a clearly defined procedure for finalizing strategies for implementation and by securing the funding needed to keep all essential participants active.

In the immediate future, SJRMP will complete the requirement spelled out in the legislation that the Secretary for Resources appoint a project manager with the consent of the Advisory Council. The project manager will coordinate activities of the Advisory Council and Action Team.
